

ICMS Premium

Infinique Central Monitoring Software

Hybrid Solution to monitor AHD and IP Cameras

Simple and functional

Control Room

ICMS-Premium is a remote monitoring and administration software used for managing and viewing live video from Infinique's premium series DVRs and NVRs. The software provides a hybrid solution to view both Analog AHD and IP cameras on the same screen using one application.

The software is ONVIF compliant and provides a true open architecture platform, supporting a number of IP and AHD cameras from various brands and supports video compression formats such as H.265, H.264, MJPEG and MPEG4.

Features

- Live monitoring of cameras from multiple DVRs and NVRs
- Remote playback of recorded video
- Administration of recorders and cameras
- Allows users to create multiple windows
- A maximum of 128 cameras can be displayed in one application instance.
- Search logs of NVR
- Create user account and passwords
- Provides interactive E-map monitoring

ICMS Premium
