

Category 6A S/FTP Cable

Category 6A Shielded Foiled Twisted Pair Cable, RoHS Compliant

Infinique's Category 6A (Augmented Category) S/FTP, ETL verified and has been designed for high network performance of up to 550 MHz. It can be used to design 100 meter channel links as well as shorter channel links with cables and patch cord lengths as short as required, offering maximum flexibility and minimizing excess cable and patch cord lengths which offer overall cost savings.

Infinique Category 6A S/FTP cabling solution provides considerable margin above all electrical transmission performance requirements specified in ANSI/TIA-568-C.2, ISO/IEC 11801 and IEC-61156-5 and supports full duplex protocols delivering up to 10Gbps performance at frequency levels up to 550 Mhz. It provides improved bandwidth, data throughput and network efficiency and supports PoE Power of Ethernet standard (POE 802.3af) allowing data and power connection for POE equipments.

The cable jacket construction has tighter twists and its 4-pair construction with each individual pair surrounded with aluminum foil tape and braid screen reduces alien crosstalk (AXT) coupling between adjacent cables and provides extra margin of performance required for high bandwidth applications.

The Category 6A S/FTP Cable collectively with other Infinique's Category 6A U/FTP solution is the right solution for voice, data and video transmission needs. The Category 6A U/FTP Cable is offered in LSOH jackets in 1640 ft (500 m) reels to accommodate various installation requirements.
